PROFILE

To obtain a challenging position in a fast-paced environment where my expertise can continue to grow, my interpersonal skills can be utilized to reach a team goal, and my innovative idea can pace my team objective.

WORK EXPERIENCE

- Fresher

PROJECTS

- Developed a full-stack **AI image generation web app** with user authentication, initial free credits, Razorpay payment integration for credit purchases, and image download functionality. Deployed on https://generate-image-i12i.onrender.com

- Built a full-stack **Expense tracker web application** with user authentication, allowing users to log daily incomes and expenses, visualize data through interactive charts, and manage entries with add/remove functionality. https://expense-frontend-evgk.onrender.com

- Designed and developed a full-featured **Library Management System** with role-based access control. Users can register, view available books, and track their borrowed and returned books through both interactive charts and textual summaries. Admins have full access to manage the library, including assigning books to registered users, updating book quantities, and monitoring borrow/return activity. The system automatically calculates and applies overdue charges for late returns. Integrated secure email-based password reset functionality and ensured a seamless user experience across all operations.
